FIBRE

HOW TO SET UP YOUR NEW ROUTER

GUIDELINES

Welcome to Cell C Fibre!
You have just received your new router. Before you enjoy your high speed, uncapped connectivity, here's a quick guide to get you going:

WHAT'S IN THE BOX?

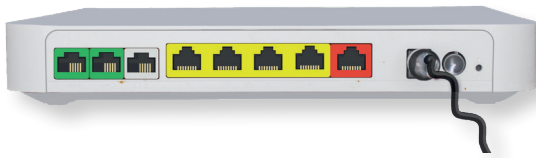

| A USER MANUAL | 1X ROUTER | 1X POWER ADAPTOR | 1X YELLOW ETHERNET CABLE |

FOLLOW THESE EASY STEPS TO CONNECT YOUR ROUTER:

NB: Please **do not turn your Router ON** until you have all cables connected.

Step 1
Firstly, take your Router out of the box and connect the Power Adaptor.

Step 2
Connect one end of the Yellow Ethernet/LAN cable in the Red WAN port on the back of your Technicolor Router.

Step 3
Connect the other end of the Yellow Ethernet Cable to the Fibre box installed by the network provider. NB: Connect the Cable to LAN1/GE1 if the Fibre box has more than one port.

Step 4
Once all cables are connected, you can now switch on the Router. Leave the router for 5-10 minutes for all lights to be on, as shown below.

Step 5
Connect your mobile phone or personal computer using the wireless details under the Router and enjoy your internet!
